Security Policy

Effective Date: November, 2, 2024

At Archimedes, we take the security of our users' information seriously. This Security Policy outlines the measures we implement to safeguard your data and maintain the integrity of our website.

1. Data Protection Practices

- **Login Information**: We securely store only your login credentials to ensure app access. We use industry-standard encryption methods to protect your username and password.
- **Payment Security**: All payment transactions are handled through Stripe. **We do not store or have access to your payment details**, including credit card or billing information. Stripe manages payment processing using its secure systems. For details on Stripe's security measures, please refer to Stripe's Security Documentation.

2. No Ads, Cookies, or Tracking

We value your privacy and security. Archimedes does not use cookies, track user activity, or run ads, ensuring that no unnecessary data is collected or shared.

3. Third-Party Service Security

Our website may contain links to third-party sites. Archimedes is not responsible for the security practices of these external sites, and we recommend reviewing the security policies of any third-party services.

4. Regular Security Audits

We periodically review our security measures to ensure ongoing protection against threats. Any updates to our security practices will be reflected in this policy.

5. User Responsibilities

We encourage you to take steps to protect your login credentials, including creating a strong password and not sharing it with others. Archimedes will never ask for your password outside of our secure login page.
